

You Only Live Twice - The New SAPERION Web Client

Axel Kroll

Chief Technology Officer

Lizenz zur Effizienz

- New and exciting functionality
- Must be State-of-the-Art
- Use new Web 2.0 technologies
- Scalability

- Based on Customer and Partner Input
- Web 2.0 Technology
- Interoperable with Rich Client
- Suitable for High Security Environments
 - No active Plug-In Technology (Flash, Silverlight)
- Simple Configuration without Programming
- Scalable

- Ajax Framework ZK
 - Browser independent
 - Mobile enabled
- MVP (Model / View / Presenter)
 - Separation of UI/Data/Backend
- Java-Application-Server Backend with SAPERION SCR
- Themes for Skinning

- Designer creates applications (iForms) for Web and Rich Client
- Supports all UI components for Web and Rich Client
- No duplicate design effort
- Existing applications can be easily ported

- All UI components can run without iForms
- Java Server Faces, ZK or similar tools can be used for Design and full Java programming
- Easily embed into Portals

- Use components and Services from the Web
 - E.g. Google Maps, Xing, YouTube
- Embed in iForms
- State-of-the-art Web Technology
 - Available in both Clients

- Today's clients must provide strong folder based functionality
- Folders intended to enhance and replace Outliner
- Compound Folders in Workflow
- Logical Folders
- Usage of documents can be tracked
